DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 15, 2004 has been entered.

Any rejection or objection not expressly repeated has been withdrawn. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Specification

The amendment filed January 15, 2004 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The text that has been added to the specification appears to be from the parent application. The examiner appreciates that Applicant has a priority claim under 35 U.S.C. 120 to U.S. application number 09/634,152. However, the examiner does not find where this application was incorporated by reference at the time of filing, and a priority claim does not amount to an incorporation by reference that would entitle

Applicant to add this text. Mere reference to another application is not incorporation of anything therein into the application containing such reference.

Applicant is required to cancel the new matter in the reply to this Office Action.

Art Unit: 1623

Claim Rejections - 35 USC § 102

Claims 1, 2, 4-6, and 8-10 are again rejected under 35 U.S.C. 102(b) as being anticipated by SALVEMINI et al (Science, 1999), as set forth in previous Office actions.

Claim Rejections - 35 USC § 103

Claims 1-7 are again rejected under 35 U.S.C. 103(a) as being unpatentable over SALVEMINI et al (Science, 1999), as set forth in previous Office actions.

Applicant's arguments filed January 15, 2004 have been fully considered but they are not persuasive. The arguments to both rejections are the same and will be discussed together.

Applicant continues to assert that the reference is not prior art because of the priority claims to U.S. application number 09/634,152. Applicant notes that sections of the specification have been reinstated, and the reinstated matter "supports claims for inflammatory treatments and compositions now claimed."

Even if, for the sake of argument, the added text were entitled to entry (see discussion above), this would not provide support for the *present* method in the *parent application*. The claimed benefit cannot be accorded because there is no support for the presently claimed invention in the parent application. See MPEP 2133.01 and case law cited therein.
